Value

£71K

History

St Anne and St Agnes Church, founded in the 12th Century, was one of over 50 churches to be rebuilt by Sir Christopher Wren after The Great Fire of London in the 17th Century. Its unusual double dedication, unique in the City, seems to have been acquired sometime in the 15th Century. A Grade 1 listed building, the church is now used by the Lutheran Church. It also hosts popular classical and jazz seasons, including a varied program of lunchtime concerts.

Scope of Works

The project involved the installation of a new sustainable LED lighting and control system, complete with all associated electrical works and commissioning services. The work comprised fitting of all luminaires, power and control containment and providing a comprehensive NICEIC periodic inspection. An exciting project to be involved with and we thank St Anne's & St Agnes Church for entrusting us to deliver.

Services Installed

- Central control LED lighting system
- Design and supply of power control containment for installation
- Temporary lighting and power for safe completion of works
- Commissioning of lighting control system and all luminaires
- Testing and inspection of all electrical installation in worship areas
