St Mary's Church

## Heritage

### St Mary's Church, Cadogan Street, London – Lighting

#### Client

St Mary's Church

#### Main Contractor

E V Bullen

#### Value

£180,000

#### History:

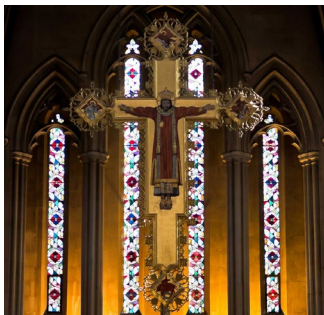

One of the oldest Roman Catholic parishes in Central London, St Mary's Church in Cadogan Street is a few minutes' walk from Sloane Square and underground station. Priests and people have met and offered Mass in various buildings around the parish since 1794. Many people have lived here all their lives and they are joined by a large number of people from other parts of Europe, the USA, the Philippines, South America and Africa, giving the parish a truly international feel.

#### Scope of Works:

The project involved the installation of a new sustainable LED lighting & CCTV system throughout the worship areas. All new LED lighting is now controlled via a Lutron dimming control system, this gives multiple scene setting throughout to enable lighting levels to be set as desired, for each service. A wonderful project to be involved with and we would like to thank St Mary's Church Parish and Light Perceptions Ltd for entrusting us to deliver.

#### Services Installed:

- New Lutron control system
- Installation of all new LED throughout
- Installation of new CCTV throughout
